partner spotlight: Itza Wood, Guatemala

Itza Wood creates jobs and fosters positive social impact in a place where poverty is crushing.

Located in the largest remaining tropical forest of Central America, the Petén Jungle in Guatemala, Itza Wood's skilled carpenters work conscientiously with an array of gorgeous, exotic woods that are native, sustainable and FSC certified. Their reforestation project planted 45,000 trees before cutting a single one.

Their carpenters live in the local communities where families are struggling to ensure basic human services. Reliant on subsistence farming and little else, many families live in homes with thatched roofs, dirt floors and no electricity or running water. But Itza Wood is linking families to a future with hope and well-being.

While crafting beautiful products, they also focus on education and reforestation. Their commitment to learning is a driving force, generously supporting The Jungle School, a safe haven that provides K-12 education for over 400 children from 9 surrounding villages. Teaching includes skills and incentives to protect the areas' resources.

With every Itza gift, you feel the jungle in your hands and help preserve the beauty of the Petén while alleviating poverty.
